

United by the mission

Working together to deliver the UK's future land operating environment

A proud partnership

Team TARIAN are a flexible team led by a unique blend of renowned UK domain-specific experts working together to deliver the UK's future land operating environment.

With an open standards approach to innovation through an agile team, Team TARIAN harness the best capabilities of British industry to support the UK's operational needs at home and abroad.

An integrated ecosystem of the best innovators the UK has to offer, we bring together **General Dynamics Mission Systems, L3Harris, Roke** and **CGI** to deliver the capabilities of the future to the mission of today.

Our proud partnership combines decades of experience with best practices in open platform development to create a new gold standard for life-saving frontline technology.

An innovative approach

Team TARIAN's approach is built on four foundational pillars and one key promise – to ensure all that we do is **Collaborative, Agile, Enduring** and **Integrated**.

Collaborative

An ever-growing ecosystem of trusted UK partners dedicated to saving lives

Agile

Developing best of breed, scalable and future-proofed open architectures that prevent the event

Enduring

Combining our collective decades of experience our solutions are built to evolve with the changing landscape

Integrated

From solutions to processes our approach is integrated at every level to put the future of defence at the commander's fingertips

TEAM TARIAN FACTS

Expert-led

Led by over 4,000 UK specialists, we harness the prowess of real people to solve real-world problems

Future-focused

Our scalable and future-proofed solutions are aligned to the UK's land CEMA architecture approach

Mission-driven

Our partners already provide the UK's medium weight land EW network

Market-proven

We have decades of experience within UK, FVEYS and RoW markets
