NetLink Data Link Processor

SHARED WITH THE RIGHT PEOPLE

A true multi-link, multi-client information exchange software solution for joint and coalition operations.

Accurate translation between tactical networks that previously could not share data, removing errors and the need for voice co-ordination, giving a unified picture of the battlespace.

Exchange tactical information over a multitude of message formats used by tactical and operational networks.

Open systems architecture facilitating integration with the existing mission system's host application.

Features

- Software only solution
- Easily integrated with your existing Tactical applications
- Tactical Data Links - Link 11, Link 16, Link 22, and VMF
- Deployed in air, land, and maritime systems
- Flexibility in data link selection using 'Link Manager' software plug-ins
- Supports all popular Operating Systems
- Complete life cycle support
- Scalable, supporting Single, Dual, and Multilink operations
- Open standard Interfaces - DDS, KML, Web Services
- Implementation flexibility focused on reduced size, weight, and power (SWaP)
